Web-Design, Setup, Maintenance and SEO

Specialist Services

In addition to the practical repair services provided, we can also design, implement and maintain your Internet needs, from obtaining your unique Domain-Name to creating, maintaining and promoting dynamic, imaginative and effective websites for personal or business use. This will allow you to advertise your own products and services to the widest audience possible and at the most economical of rates.

With almost three decades spent professionally servicing Jersey's computer communities, our disciplines range from the mundane to the specialised & highly sensitive.

It is not possible to convey all of our support services within the confines of a single information sheet, so would welcome your enquiries.

*Always available on 07797925094

Never knew what you'd got - 'til it was gone?

Data Recovery

Few things can be more frustrating, even traumatic, than the loss of data through accidental formatting, deletion, hardware failure or malicious viral infections which may be crucial, irreplaceable, of sentimental value or simply amassed over a significant time period.

Whether data loss occurs to your Computer's Hard-Disc Storage, Memory Stick or Pictures from your Camera - we can help to recover it.

Unlike most Data Recovery Service Providers, *we do not levy premium rates* (costing hundreds & even thousands of pounds) for solving your lost data dilemmas.

Having first-hand experience of this, we only charge very low rates to resolve it - as opposed to "cashing in" on your misfortune. We back this with a "no data recovery - no workshop-fee" promise.

*Always available on 07797925094

Controlling your privacy. Be secure - not a victim.

Data Destruction

We hear, almost daily, of incidences where sensitive or implicating data is lost, stolen, "found" and/or sold & revealed by those who may not have our best interests at heart.

Ensure that you do not become a victim of data "discovery" & the possible repercussions to yourself or your business/institution. We are able to maintain your data storage device functionality - in order that you can pass it to another - yet render the data so irrecoverable that even we could not access it.

As with our Data Recovery Solutions, we charge only standard rates for this increasingly important service.

Deleting/Formatting is NOT enough.

Just how valuable might your work &/or personal data be, to others?
